

Simplify AR With Integrated Payments

••• Could more efficient payment processes benefit your accounts receivable (AR) team?

Reduce manual effort, increase security and simplify reconciliation with AR payment solutions from REPAY.

••• Intelligently Integrated

REPAY integrates into any ERP software for end-to-end payment management from a single platform. Customers can make payments 24/7 using digital methods, including credit cards and ACH through online portals, IVR/phone and mobile.

Eliminate time-consuming
file imports

Increase employee consistency,
accuracy and efficiency

Expedite payments and
funds settlement

Reduce fraud risks and
ensure compliance

•• Features That Favor Business

Protect Every Payment

Don't take on payment security on your own. REPAY tokenizes and safely stores all payment data within our vault, maintaining PCI compliance and enabling faster future payments.

Level 3 Capabilities

Save on interchange costs for B2B transactions when you automatically enrich them with Level 3 data. Providing additional details enables these transactions to qualify at lower interchange rates.

Realtime Reporting

Stop chasing payments and manually updating ledgers. Our integration enables realtime reporting to reduce manual errors and time spent tracking transactions.

•• Improve Your Financial Health

Optimize AR to increase efficiency and maintain cash flow.
