REPAY Vault

The REPAY Vault is fully integrated within the OpenCart software, allowing you to store customer payment credentials off of your own server for future use. REPAY Vault is a PCI/DSS compliant gateway with many reporting tools for reconciliation. Use our tokenized protection and data encryption to further enhance your security.

Hosted Form via secure iFrame

Our OpenCart-ready hosted form is perfect for developers, partners, and merchants to adopt as a part of their payment processing solution. The REPAY solution was designed to seamlessly integrate with the OpenCart payments page to sit on our servers and process Level 3 data at significantly lower rates. This hosted form captures customer information and collects sensitive cardholder data, reducing your PCI/DSS scope. Protect yourself from security breaches and heavy fines while providing an easy to use payment option for customers.

Easily configure the look and feel of the hosted form to suit your needs. Our in-house development team is standing by to walk you through the process today.

A screenshot of a web application interface. On the left is a dark sidebar with menu items: CREDIT CARDS, RECURRING, CUSTOMER VAULT, INVOICES, SOFTWARE, and OTHER SERVICES. The main content area shows a user profile for 'Melanie Frasier' and a search bar. Below is a breadcrumb trail: Home / Reports / Transaction Report. The title is 'Transaction Report' with a date range: 01/01/2019 12:00 AM To 01/04/2019 11:59 PM. A table displays transaction data:

Type	Status	ID	Amount	Cust
Card Sale	Approved	4455865290 PMT-001402	20.00	q barke
Card Sale	Approved	4456059634 1234 4456511826	90.00	ABC Math

Level 3 B2B Rates

Level 3 processing allows you to receive discounted rates on Visa® and Mastercard® B2B transactions. Level 3 transactions use lower interchange rates than Level 1 and Level 2 transactions. Merchants wanting to receive Level 3 processing rates must be on an Interchange Plus pricing plan. The OpenCart integration from REPAY automatically sends the required data to ensure maximum cost savings for B2B transactions.

A screenshot of a web form titled 'Order History'. It has three tabs: History, Additional, and REPAY. The REPAY tab is active, showing a table with the following data:

Text	Value
Payment Type	sale
Transaction ID	5409230814
Transaction Date	06/04/2020 15:06:23
Authorized Amount	106.00
Environment	sandbox
Customer VaultID	284806821
Billing-ID	575878855
Masked CC Number	601160*****6611
Exp. Date	1025
AVS Response	Z
CVV Response	M

At the bottom of the form, there is a text input field containing '106' and a blue 'Refund' button.
